Standard Package (\$85) Test

Conservation Commission will
deliver Test Kits to NH DHHS
Public Health Lab on May 8

Results will be mailed directly to
you along with instructions about
options you may want to take.

TESTING YOUR WATER IS EASY

- The first step to keeping your family safe is to test your well water for **arsenic** and other contaminants.
- The cost to test your water ranges from about \$15 for just **arsenic** to \$85 for a standard package of tests of the most common contaminants.
- Sample collection bottles will be provided at Wed, May 3 Meeting & samples can be returned at Town Hall Sunday, May 7. Directions will be included in your kit.
- If testing shows that there are unsafe levels of **arsenic**, there are reliable options to address it.
