'Mosquito Bridge' to be completed

LACONIA — The new steel bridge across Lake Winnisquam on the state road would be closed, April 24, 1916, “as the workmen will commence laying the cement floor,” *The Laconia Democrat* reported, 100 years ago this week.

“The bridge will be closed until this work is completed, probably a month or six weeks.”

Meanwhile, the Winnisquam correspondent reported that Ross Dalton was “laying a new floor on the ferry and making it in good condition for the spring work.”
