Major road reconstruction scheduled for Route 106 between Belmont, Laconia

FROM STAFF REPORTS

BELMONT—The New Hampshire Department of Transportation has announced major roadway reconstruction will take place on Route 106 between Belmont and Laconia starting next week.

Beginning on Monday, Sept. 12, roadway reconstruction will begin on a section of Route 106 extending from just north of the intersection with Dutile Road and Leavitt Road in Belmont to the intersection of South Main Street in Laconia.

The work will take several weeks with a completion date of Oct. 27 expected. During the project motorists can expect lane shifts and one-way alternating traffic when it becomes necessary.

Uniformed officers and flaggers will be used to direct motorists through the work zone. New Hampshire DOT says that periodic delays can be expected between the hours of 6 a.m. and 6 p.m.

The project includes pavement rehabilitation of five miles of Route 106 between the two towns. Also, work will take place on eight-tenths of a mile on the Laconia bypass, and the rehabilitation of three bridges.

Busby Construction of Atkinson is the contractor for the \$7.2 million project.

Meanwhile, it has been announced that road work on downtown Franklin has been completed and North Main Street is now open to two-way traffic.
