Subject: RE: THSC

Ken,
Thank you for your response regarding the THSC. To clarify your 1st paragraph on page 2, I received a quote and advised the BOS that the proper engineering study of Town Hall would cost approximately \$15 - 18,000. I believe your committee was verbally advised of this estimate. The BOS did not feel this was a prudent use of taxpayer dollars at this time.

With regard to the Shaker School District, I discussed this with Mr. Cozort who did not feel this was a feasible idea because of the 2 town involvement. I believe I again conveyed this to you and some of your committee verbally. I also remember Mr. Morse visiting my office and briefly discussing this with a parting word that he also would talk to the school officials

We will look forward to the committee's report sometime in the Spring of this year.

Don McLelland Sr.
